قال تعالى (يَرْفَعِ اللَّهَ الَّذِينَ آمَنُوا مِنكُمْ وَالَّذِينَ أُوتُوا الْعِلْمَ دَرَجَاتٍ)

تفريغ المعلوماتية زميلتكم بتول حازم

# Objectives

 Define the term drug information, use it in different contexts, and relate it to the term medication information.

 Describe the importance of drug information centers in the evolution of pharmacy practice.

3. Identify the services provided by drug information centers.

 Identify medication information functions performed by individual pharmacists.

# Objectives

 Describe the skills needed by pharmacists to perform medication information functions.

6. Identify major factors that have influenced the ability of pharmacists to provide medication information.

 Describe practice opportunities for a medication information specialist.

#### A broad definition of DRUG INFORMATION

• Drug information is both: a body of data and information about medications and a set of skills and tools that provide pharmacy professionals with the ability to find, access, understand, interpret, apply and communicate information and acquire knowledge.

 The body of facts and information pertaining to medications is generally referred to as "the drug literature".

Subject Lecture 2 - Drug information Il is list ample of drug information of Illami Broad definition of drug information. I adrug information. Fila Drug information 11 .. #### A broad definition of DRUG INFORMATION

- The literature of pharmacy and pharmaceutics encompasses all aspects of drugs, beginning with isolation or synthesis, including physical analysis, bioactivity, toxicology, clinical research, market research, and economic and social considerations.
- The drug literature, reflecting all the individuals who create it and use it, such as chemists, biomedical scientists, all the various health care professionals, attorneys, and patients, is vast and complex.

#### A broad definition of DRUG INFORMATION

• Different kinds of publications are available in the library like journals, abstracting and indexing publications, books, compendia (detailed information about a particular subject), monographs, patents proceedings, reviews, FDA-approved labeling (package inserts), newsletters, promotional literature, government documents, and analysis by consulting services.

6- Compendia un intell Aportonom etribus ellaices Desialle of Particular Subject Le d'iseases W Was iSac Essell Dis isites le report de rece leistes edgazon of 7- patents proceeding etail ilst ilst, 8- Reviews 9- FDA -approved labeling was clinical trials is like is in is is it of I phase I 10- Newsletters out with the literature of the Newsletters of the literature of literatu 13 - Analysis by consulting Services - publications 11 dais Viz me d'il vere les est à l'air sont le parts

#### A broad definition of DRUG INFORMATION

 Drug information skills coupled with the processes and technology offered by informatics are part of the solution to mastering information overload and maintaining the knowledge system that improves patient care outcomes.

#### Information Needs

- The growth in the role played by science in medicine as reflected in:
- The amount of published work.
- 2. The number of journals.
- 3. The vast range of drug products in the market.
- It has meant that practioners of medicine and pharmacy, in common with other scientific disciplines, have experienced difficulty in keeping up with advances in knowledge.

#### Information Needs

 The doctor's response, increasingly, has been to turn to the pharmacist for help.

- Most problems presented by the doctor are concerned with a particular patient, his disease-state and therapy.
- The information requested is usually required within few hours, so that treatment may be changed or started and is needed in the form of data, rather than lists of references or paper reprints.

Che alil - elilar qu'iller Mieles 1/1 tieles 1/2 the liberes l'Esperal We Wester 12 jet of 12 first formation Il 2 is find formation Il 2 is first formation Il 2 is built as he will be be the first formation Il 2 is built as he will be be the first formation Il 2 is built as he will be be the first formation Il 2 is built as he will be be the first formation Il 2 is built as he will be a first formation Il 2 is عولوق عن نفو له و يومينا العلومات بهذل سريح لن هما الطب العلومات سَهُ لَكُلُ مِنْ الْمُنْ الْمُ कर्यां हरी करें दिये .. हेरियार के दिया करिक राहित Es les tipes electronic al rés is l'électronic E Marsh Jan Will responded Til Windle What Parient/Care 11 imas is gives l'alia 's is is son pull 12 15 is onis one from the do (for, gives

#### Information Needs

 Production of an answer therefore involves selection, interpretation and evaluation of information.

 The type of information requested may include any of the chemical or biological properties of a compound or a comparison of the suitability of several compounds for a specific case, where for instance, renal or hepatic disease may complicate choice.

#### Information Needs

 The pharmacist too, may require immediate information on drugs, this may concern straightforward matters such as dosage or availability but also involve formulation or availability data which may not be found in the manufacturer's literature.

- Quality controllers may require an alternative assay or stability data.
- Nurses need to know the effects and dangers of drug therapy so as to be able to assess the appearance of adverse effects, they must also know enough about preparations to teach patients to use them.

#### Information Needs

 Researchers need to retrieve a particular report, or search the literature.

- Committees need information to help them decide policies, produce hospital formularies and award contracts.
- Patients need to know how to take the medicines they are given, what they will feel if the drug works, likely adverse effects and what to do about them.
- Measuring and accurately identifying the nature of the need is, however, not easy.

### **Drug Literature**

- The concept of drug information service or drug information center is an attempt to document drugs by abstracting information about them.
- The information about drugs is collected from various sources which are available.
- In 1972 Walton and colleagues modeled the drug literature as a pyramid with the primary literature forming the base of the pyramid, the secondary literature interfacing and serving as a bridge from the primary literature to reference works (tertiary literature).

Drug Literature JESET = osle drug information 11 a drug information 11 is Cust in asually \* E drugs by abstracting information about them is documentation Elicator de 1/2 de 2/2 1/2 de into & doning literature Il Module ble atilició Elic 000 PB 1523 de Odes 3 Categories Subject..... ## Information Retrieval Systems

- As a drug moves along the path from discovery to the market and into worldwide use, data and information about the agent are created and accumulated. When this information is published, its value and usefulness to scientific, professional, and patient communities becomes known.
- Publication of research results at each step of the path is essential.
   There is tendency particularly in clinical research, not to publish "negative" results. When this happens we are left with only research that is favorable to the drug, resulting in a skewed picture of the drug's place in therapy.

INFORMATION RETRIEVAL SYSTEMS - 37 3's synthes is I be of also covery the size Ulb drug 16 drug II l'a data e iladel accumulation i au to to market 45 6 25 Thouby O'Da Ziscoladal discovery a creation and ese drug information Center 1/2 rios Publishing les Ces Was drug information Center 1/2 2005 Publishing of Just in 36 Citte de tes en l'action l'action l'élans qu'il le le Witer and The day 11 stab offine the perbiliere market Malada as islandas lind Tadon market W don's 31 45 Covery 11 2's le publishing dé l'iournale 11 negative resultang la Jule journals li alille Not a result of the new heading results -uil eat o unes électro e fathilier lique 11 shores iles seins As sele de thosen surtagen un ti in in in east 166 dell'is us it is in it is negative result is is is ويفاعر معه لفس الاستلة وهذه واحدة من لاستاكل بالنبه ليتي المحلقة المحلفة المحلفة المستاكة المستوات المستوات والا عدائمة المراجع والمناح والمداحة المحلفة المح

## Information Retrieval Systems

- The path of drug development and marketing offers a structure that is useful to scientists and practioners concerned with compounds of potential therapeutic value.
- The resources themselves are classified as primary (original research), secondary (indexing and abstracting services), and tertiary (textbooks and evaluated information).

## Information Retrieval Systems

 Individual resources are now generally available in more than one physical format; for example, a journal may be available as a paper publication or as an electronic publication (either individually or as part of a publisher's electronic journal collection or content collection).

 Primary, secondary, and tertiary resources are available for each step in the path of drug development, but reporting time increases from each step to the next.

# Information Retrieval Systems

# Preclinical Drug information:

At this point a **compound is recognized** and then considered for potential pharmaceutical or therapeutic usefulness; researchers will be both consumers of and contributors to the data-information-knowledge cycle that characterizes science. Initially, in the synthesis and purification phase of drug development, information about the compound's chemistry and physical properties may be both sought and created. Whether or not the compound has been of interest to other researchers may be determined by searching public records of grant and contract awards and also by searching resources that cover preliminary and early research results. The patent status of the compound may need to be established.

# Information Retrieval Systems

### Phase IV Studies and Post Marketing Drug Information:

- √ During the Phase IV Studies and Post Marketing Drug Information stages a thorough literature search is required to find material relevant to the clinical use of the drug.
- √ This will require not only searching the basic bibliographic databases such as Biological Abstracts, EMBASE, IDIS, IPA, MEDLINE, and Science Citation Index, but also searching the patent literature, using Patent and Trademark.

& Phase IV Studies and post Marketing Drug Information) During the Phase IV Studies and post Marketing Drug information Stages Marketing l'este buil ever lier l'eds vait all mature l'été ment elie ite d'un surbonstil. prechinical 11 à clinical 11 au chinical use Mario il 129 post marketings in preclimal Il l'alibe la me Information 11 s'e l'elle l'éclient data bases Elevisité Walso phase IN & North Post - marking I sily toll -Brological Abstracts y-Etro Y 25 15 52 35 data base giel of selising - LOPALINE Light d'e 18destirik enhant 4 sents e Post marketing

vi) Science Citation Index: Science Citation Index (SCI) provides access to current and retrospective bibliographical information, author abstracts, and cited references found in various scholarly science and technical journals covering more than 150 disciplines.

## Summary

 The pharmacist's role in providing information on drugs and medicines is not new. When drugs were few in number and generally of relatively low potency the number of inquiries was small and could usually be answered quickly by reference to pharmacopoeias and formularies.

 In recent years, the number of drugs and medicines has increased enormously which are usually more potent and more selective and also the literature relating to drugs has expanded at a staggering rate.

Subject -e Summary & Asa Conclusion medicines II a drugs lie providing lail Weill Will with the wind information potency 11 a alle drugs of iledali de co me sail sur And district of some of participal of policies of the sold of the The Mand et distery is is toolso su Answerings law it of golg . # Summary

 The literature covers a wealth of information on these newer drugs, their actions, clinical uses, unwanted effects, interactions with other drugs, comparative efficacy, etc.

 A quick reference to pharmacopoeia and formularies is no longer sufficient, in many cases, to provide an adequate answer.
